

Mostafa Ebrahim Elrefaey

Front-End Developer | Vue.js & React.js

Phone: +201091602084 | Email: mostafa.elrefaey3@gmail.com | Tanta, Egypt

[LinkedIn](#) | [GitHub](#)

OBJECTIVE

Front-End Developer with hands-on experience building enterprise-grade production applications using Vue.js (Nuxt) and React.js, now expanding into full-stack development. Comfortable working across API integration, backend/database debugging, and real business workflows (OMS, shipments, invoicing, finance, vendors, freight, customer management). CS fundamentals with a background in C++ problem solving, and an early, active adopter of AI coding agents (Antigravity) and prompt/harness engineering to accelerate delivery. Fast learner, comfortable picking up new stacks and tools quickly in fast-paced, agile teams.

TECHNICAL SKILLS

Front-End: React.js, Vue 3, Nuxt, JavaScript, HTML, CSS, Pinia, Styled Components, Naive UI

Backend & Data: REST APIs, Firebase, Firestore, Backend/Database Debugging

Domain Experience: Enterprise Logistics, OMS, Shipments, Invoicing, Finance, Vendors & Freight

Tools & Workflow: Git, GitHub, pnpm, Turborepo, Cypress, Sentry, Agile/Scrum

AI-Assisted Development: Antigravity (AI coding agent) for development, prompt engineering, fast adoption of new AI tooling and harnesses

EXPERIENCE & INTERNSHIPS

Front-End Developer — Baridx (Full-time)

Nov 2025 – Jul 2026

- Developed and maintained features for an enterprise logistics platform using Vue 3 and Nuxt 4, working across the full front-end stack in a production environment.
- Worked closely with backend APIs and databases across core business modules — OMS, shipments, invoices, finance, vendors, freight, and customer management — including debugging backend/data issues affecting the UI.
- Built and maintained shared UI components with Naive UI inside a Turborepo monorepo managed with pnpm, ensuring consistency and reusability across multiple applications.
- Managed application state with Pinia.
- Monitored and resolved production issues using Sentry, improving application stability and reliability.
- Wrote automated end-to-end tests with Cypress to catch regressions and support safe, frequent releases.

Front-End Scholarship Program — Digital Egypt Pioneer

Oct 2024 – Apr 2025

- Completed advanced training in React.js, JavaScript (ES6+), HTML5, CSS3, and Bootstrap.
- Developed 5+ responsive and interactive web interfaces through practical, real-world projects.

Information Technology Institute (ITI), Creativa Tanta

Oct 2024 – Aug 2025

- Completed a 120-hour React-focused training covering client-side technologies, ES6+, and Bootstrap.
- Built 3+ dynamic web applications with a focus on component-based architecture and state management.
- Collaborated with a team of 5 developers to build scalable front-end projects using Git and Agile practices, improving UI performance by 30% through optimization.

EDUCATION

Bachelor's Degree in Computer Science

Tanta University — Sep 2022 – Jun 2026

ACHIEVEMENTS

- Islam Life — Developed an advanced Islamic platform offering Quran (multiple reciters), prayer times with Adhan, and daily Azkar. Integrated 3+ external APIs, implemented robust error handling, and built a modern, responsive UI that improved user experience by 25%. (React.js) — github.com/refaey3/IslamLife
- Chat App — Developed a real-time messaging app featuring Firebase Authentication and Firestore. Integrated user status tracking (online/offline), emoji picker, and toast notifications. Optimized data flow for smooth real-time communication. (React.js) — github.com/refaey3/ChatApp
